

System	Purpose
100K	sequence 100,000 genomes from around 70,000 people. Participants are NHS patients with a rare disease, plus their families, and patients with cancer.
3D Tempulog (Blood Transfusion)	
3-Shape	Dental model imaging system
Allscripts	SCM Electronic Patient Record
Altrax CSSD Instrument tracking	Instrument tracking system for Dental Sterile Services.
APEX	
AQUIRE	
ARC	To produce a complete anaesthetic record. Automatic capturing of patient vital signs.
Ascribe (Pharmacy)	Ascribe satisfies four basic requirements in the Pharmacy Department: · Stock Control & Purchasing, · Distribution/Clinical label production, · Aseptic Drug Manufacturing, and · Financial/Transaction reporting
ASSETSTUDIO	Software Asset Management
AVANTEC-Omniceil	Omniceil systems provide quick, convenient access to medicines and supplies and has an extensive range of reporting tools. The cabinets have easy touch-screen operation and Omnicell's unique "guiding light" technology quickly directs users by providing a flashing light at the location of specified items
Badgernet	Maternity System
BDS	ESR and User account provisioning and integration
BIP Delta Suite	E- tendering system
BIU – Data warehouse	The system is used for trustwide and external reporting. Performance reporting, ad-hoc analysis, DoH returns etc.
Blood Track	Tracking of blood products from blood bank to the ward
Bone Marrow Transplant	Bone Marrow Transplant (BMT) service for King's and Guy's and St Thomas's NHS Foundation Trusts. This has the largest BMT programme in the UK and performs more than 160 transplants a year
Clik (Safeguarding Children)	Monitoring Safeguarding Children's Team (SCT)
Clinical Audit System for Liver ICU	Monitor & measure clinical performance, using the APACHE II Severity Scoring System Standardised Mortality Ratio as an Audit Tool
CLOZAPINE	CLOZAPINE drug monitoring
COBAS IT 1000 (Biochemistry Data Manager)	
Cognos	
Cohort	Occupational Health and Wellbeing
Compuscope	Recording clinical outcomes, reporting of QA audit data, results recording and a report writing feature
Conference Booking System (CABS)	Booking rooms in the Postgraduate Medical Centre
CubeScribe (Document Transcription)	Online Transcription Service
Cyres (Cervical Screening: Cytology)	
DARTVIEW (scan request forms)	
Datix (Adverse Incident Report)	Adverse incident is an unintended event or circumstance affecting patients, staff, visitors or the Trust's assets/reputation that caused harm or has the potential to do so. A Near miss is a potentially harmful event that is prevented from developing further, thus avoiding harm to any person or the Trust's assets or reputation.

<b>Dawn Database</b>	The database contains all the demographic/medical/medication/clinical activity information on approx 4,500 patients relating to their anticoagulation. The system incorporates a dosing and appt algorithm for patients on oral anticoagulation
<b>Dental File Server</b>	Central storage for all dental users 'My Documents'
<b>Dental Room Booking System</b>	Dental room booking system - Runs on College network (So as to be available from both KCH and KCL networks)
<b>Dental Technicians Database</b>	Dental Technicians work record
<b>Dental-bu</b>	3 tb data backup store for dental x-ray
<b>DentalScan</b>	Server for Romexis Software - also hosts space for lab technicians
<b>Dental-TS/Dent-TS1 to TS3</b>	Dental Terminal servers for community dental
<b>DISH + DataLink+ Datapump</b>	Support system for Hepatitis Testing Service to the Trust .
<b>DMARD Monitoring</b>	Real time receipt of test results from WinPath or APEX laboratory systems and display within the viewer
<b>Docman</b>	<p>Is a document management system which will enable the organisation to become paper light.</p> <p>Referrals can be work flowed electronically around the organisation for review and actioning whilst maintaining a complete audit trail. Instead of sending hard copies of referrals and associated documents, these can now be sent electronically to clinical staff for review.</p> <p>This reduces the volume of paper moving around the trust reducing the risk of loss and subsequent delays in waiting for duplicates</p>
<b>Dolphin Imaging System</b>	Digital Image manipulation for Orthodontic care
<b>Dolphin Imaging System "QMS"</b>	Digital Image manipulation for Orthodontic care
<b>EDT HUB</b>	EDT Hub captures documents from Secondary Care systems and distributes them to any GP practice. The solution extends this functionality to allow for two way document transfer between organisations, for example GP practices sending electronic documents to hospitals.
<b>eLearning zone</b>	Provide training for in house systems and over 200 vocational courses. Provide internet and email access to all staff
<b>Electronic Staff Record</b>	Integrated Human Resource and Payroll System for all NHS employees. ESR is the system the KCH will use to run its payroll from May 2007.
<b>EPMA</b>	
<b>EPOC Monitor + EPOC Audit Support</b>	EPOC Monitor is patient record software used to record all clinical activity. Used for analysis, reporting and external letter production. EPOC Audit Support records patient information during audit meetings and generates the necessary printouts to assist with administrative tasks required by audit.
<b>EROSTERING</b>	Erostering software is being rolled out to every member of staff in King's, including medical, clinical and non-clinical areas Porters and Helpdesk
<b>Erostering</b>	
<b>Essencia</b>	The management of the e-learning portal
<b>Euroking - Maternity</b>	Data collection on all aspects of pregnancy and delivery used for highlighting risk factors, clinical governance, audit & research. Monitoring clinical activity and outcomes. Management & service planning. Capture of NHS numbers for babies.
<b>Excelicare</b>	The system is used to manage the both the HIV and GUM clinic, record patient activity, diagnosis codes, demographic details and book appointments
<b>Facilities DVR Systems</b>	Trust Video surveillance

<b>First-Steps Nursery Software</b>	Day Nurseries Business Management The information captured is critical to the business of the nurseries as it is essential for recording attendances, vacancy/business projections and fees due by parents whose children attend the different nurseries
<b>FOTOWARE</b>	Digital Media
<b>Galaxy Theatre System</b>	This System deals with patient information in any of the Trust's 25 Theatres.
<b>GREENLIGHT</b>	Recruitment requests, interview details and interview decisions Leavers processes
<b>GUM In house system - Portal</b>	The system is used to manage the both the HIV and GUM clinic, record patient activity, diagnosis codes, demographic details and book appointments
<b>Haematology/Transplant MDT</b>	leukaemias and myelodysplastic syndromes;immune gene therapy for myeloid leukaemia; bone marrow transplantation and immunotherapy for myeloid malignancies
<b>Haemoglobin variant Predictor</b>	Able to examine phenotypic separation characteristics of haemoglobin molecules and predict the haemoglobin variant or mutation present within the sample
<b>HL - Hybris</b>	Catalogue & Contract Price Management system
<b>IDEAS-SERVER</b>	Assisted conception King's fertility clinic delivers the latest treatments backed by all the resources of a major hospital with a worldwide reputation for excellence
<b>Intouch (<i>Patient Check-in</i>)</b>	Express Check-In, within outpatient clinics currently the outpatient clinic areas are extremely busy. During very busy periods long patient queues are formed and often overspill into other communal areas within the Trust.
<b>Intrepid - HR</b>	Originally intended to track junior doctors in training as they move from one trust to another and to centralise information at the Post Graduate Medical Deanery. Now essentially run as a "stand alone" system to monitor study leave information on the trust's junior doctors. In particular attention is focussed on "Foundation trainees"
<b>I0G</b>	
<b>JAC</b>	Pharmacy System at the PRUH
<b>KAD</b>	King's Appraisal and Development (KAD) system is a new and exciting opportunity, and we want to ensure all staff and managers maximise its potential. All appraisals for non-medical staff across the whole Trust must be done using this tool
<b>PRUH Mortuary Care</b>	Mortuary handles deaths that have been reported to the coroner, or deaths where no death certificate can be issued. The service:
<b>KICKS 2</b>	Infection Control Monitoring
<b>King's Breast Care Database</b>	Covers running clinics, scheduling, clinical communication, data collection, audit, research
<b>Kingsdocs (<i>Document Management System</i>)</b>	Kingsdocs is an online document management system providing file storage, search and versioning. It will house all documents that are required by large numbers of staff across the Trust.
<b>KINGSPRINT</b>	Trust wide Printing Server
<b>KINGS-SFTP</b>	
<b>Kingsweb</b>	Purpose: Homepage of the intranet. Main purposes are: <ul style="list-style-type: none"> <li>• Key method of internal communication</li> <li>• Hosts the Kingsweb Directory</li> <li>• Entry point and portal to the larger King's intranet systems</li> </ul>
<b>Liver Database</b>	IT system to supports liver admin, bed mgrs, liver histopathology, transplant service, hepatobiliary oncology service.
<b>Liver Urgent Referrals</b>	Inter Hospital Referrals - Advise or Admit?
<b>Logistics OnLine and EDC</b>	e-requisitioning of Logistics items and Materials Management system for Wards and Departments

<b>MediNet</b>	Its biggest use now, is probably by the General medical care group who use it as a tool to organise the management of their in-patients. It is able to identify patients of a particular age, with particular disease types, on particular wards and under particular consultants. It supports multi-disciplinary meetings and the KOPAL team.
<b>Meditrax CSSD Instrument tracking system</b>	Instrument tracking system for Dental Sterile Services.
<b>Medtrack</b>	?
<b>METAVISION-MAIN</b>	PICU aka Thomas Cook. Interfaces with Blood Gas machines, and other obs/monitoring equipment to show vital signs for children in PICU&HDU
<b>MIDAS + DataLink+Datapump</b>	Delivers immunosuppressive drug monitoring (IDM) service to the Trust
<b>MRD Unit Database</b>	Input patients and samples details, Input tests requested, Prepare test reports
<b>MULTIMEDIA</b>	Trust wide Training Video's
<b>Multiquote</b>	Procurement system for obtaining electronic quotations
<b>MUSE</b>	Cardiac Integration Engine
<b>NBSS</b>	This system is required by the South East London Breast Screening Programme to call, screen, re-call the eligible population for breast screening. The system is also used to generate regional statistics for the Department of Health, regional QA and commissioners.
<b>Neonatal database</b>	It covers all booking in of samples rec'd, recording of patient demographics, recording of results and reporting.
<b>Neuro-Oncology</b>	MDT
<b>Neurosurgery</b>	
<b>Neurosurgery Skull Base MDT</b>	
<b>NP02 Neurophysiology</b>	Neurophysiology
<b>Occupational Health (Cohort)</b>	OH data systems are largely separate from the rest of Trust patient systems both because of the need to protect the confidentiality of staff patients from other staff, and to support the unique nature of OH services
<b>Ophthalmology</b>	
<b>Optimise</b>	To manage lease agreements, contracts and large Procurement projects.
<b>Orthodontic Planning and Assessment System (OPAS)</b>	Orthodontic Planning and Assessment System
<b>PACS</b>	To store patient imaging and provide access to various points in the trust
<b>PAGINGMAIN</b>	
<b>Palliative care</b>	As palliative care is an advisory service, we need a database to record clinical activity for financial, audit and governance purposes, as this data is not collected on PiMS
<b>PATIENT-TRANS</b>	The system includes an imaging device that precisely and consistently measures the area, depth and volume of wounds and their healing progress, and software to store and manage wound informatics. It enables wound assessment activity to be monitored, providing wound
<b>PATS</b>	Pre, Peri and Post procedural Cardiac clinical database
<b>PICU</b>	
<b>Planet FM</b>	Facilities Department Call Logging
<b>Planmeca Romexis Imaging System</b>	Digital Imaging – Capture storage and display of all dental images
<b>PND Red Cell Database</b>	The database is used to store phenotypic and genetic test results on patients and fetuses. And is used to report these genetic test results.

<b>POCT Project</b>	Initial Implementation (pilot) in ED Site Audit to be conducted by Radiometer. System to be managed by PRUH IT Pathology. Scope does not include Glucometers –will inform rocurment. Further POCT connectivity requests (non ED) will be applied for via the KCH POCT
<b>POWERGATE</b>	Sainsburys Supermarket Pharmacy Reporting
<b>POWERSTUDIO</b>	Desktops Power Saving
<b>PRISM</b>	Payroll processing, Workforce Information
<b>Procurement Portal</b>	To hold Procurement related Management information. Used to supplement other Procurement systems. Trust staff enquiry & reporting facility. Facilitates sending external questionnaires and collating the data.
<b>Protos</b>	Maternity
<b>R100_Patient Search Form - Report Manager</b>	Replacement for Oasis at the PRUH
<b>Renalware</b>	Comprehensive clinical & administration information system used throughout the department. Renal patients have a long life-cycle of care which is tracked. They will come into contact with many different staff within the renal care group who use this system to aid communication, clinical data capture & audit. The system exports a quarterly report to the national Renal Registry.
<b>RESET</b>	Trust Passwordd Reset
<b>REVIEW</b>	Pathology, Radiology and Cardiology Results
<b>Rheumatology Specialty System</b>	Patients with suspected inflammatory arthritis are fast-tracked and will be seen within three weeks of referral in our Early Inflammatory Arthritis service. We also see patients with non-inflammatory conditions such as osteoarthritis, complicated back pain, regional joint pain and chronic pain syndromes such as fibromyalgia.
<b>RIGHT-FAX</b>	Trust inbound Faxes
<b>RIGHT-FAX</b>	Fax to Email
<b>SCANTRACK</b>	
<b>Sickle Cell</b>	The treatment of Sickle Cell
<b>SILHOUETTE</b>	Silhouette is an wound imaging, 3D measurement and documentation system providing accurate wound information at the point of care and supporting the overall clinical management of wounds
<b>SOEL Health</b>	Community Dental EPR System - South London
<b>Sprinter</b>	Sprinter provides the ability to automate Procurement processes by building an electronic requisition from a catalogue of contracted products and routing the submitted requisition for approval by an authorised signatory. Also used to match invoices to orders and obtain authorisation of invoices where there is not a sufficient match.
<b>SRELAY</b>	Trust Wide notification server for KCH Notifications kch.notifications@nhs.net
<b>Symphony</b>	Facilitates patients journey through ED and captures clinical details
<b>System Center Configuration Manager</b>	PC Remote Control, Software Deployments, Operating System Deployments
<b>TeleoLogic</b>	PCS is entirely web-based to allow the greatest flexibility in terms of usage,Designed over many years working with clinicians, PCS includes a built-in screen and workflow builder to ensure complete compatibility with every clinical department's unique profile
<b>TQUEST</b>	Electronic Request - PRUH Sites
<b>TRAUMACAD</b>	Operating Theatres
<b>Viewpoint (EPU version)</b>	Gynaecology and Early Pregnancy Ultrasound scanning.
<b>Viewpoint (HBU version)</b>	External / Internal ultrasound scanning to detect, diagnose and advise on Pregnancy complications / anomalies and routine Nuchal scanning.

<b>Virology Information System (VIS), Microbiology Information System (MIS)</b>	Laboratory Information System
<b>VSCAN - EPO</b>	McAfee Management Tools
<b>WardWare</b>	Wardware provides an electronic version of the existing paper POTTS chart with the associated benefits regarding improved legibility, remote access to data and enhanced monitoring. The system is accessible on all PC which has access to trust intranet. Also iPods are being used as a data entry mobile device.
<b>WinDIP</b>	Electronic document scanning
<b>WIRED</b>	Reporting tool for Mandatory and Statutory Training Compliance
<b>XCELERA</b>	DICOM Image Archiving and Reporting of cardiac images.
