Get ready for your liver appointment:

☑ For your appointment:

◉ **Arrive 20 minutes before your appointment time**.

◉ If you have a blood test, Ultrasound or FibroScan appointment before your doctor/specialist appointment, please attend these tests and check the instructions to follow in your letter.

◉ Each consultation takes about 20 to 30 minutes. However, please allow two hours for your visit because extra tests may be required.

◉ **The Liver Outpatient Department** is open Monday to Friday from 9am to 5pm.

👍 What to expect:

◉ You may meet a doctor, specialist nurse, or pharmacist who will request more tests (blood test/scan) to have a definitive diagnosis or follow-up on your liver condition.

◉ You may have a FibroScan to measure fibrosis or stiffness in the liver. It is a non-invasive procedure that uses ultrasound technology.

◉ Following these tests, our doctors will decide on the best form of treatment for you.

◉ Our team will give you additional information and educate you about your hepatitis.
